

LUXBRIGHT

CREATING X-RAY BRILLIANCE

Senior Product Manager to Gothenburg

Luxbright is expanding and strengthening the organization in connection with the commercialization of our innovative X-ray tubes for applications in safety, materials testing, food, and medical X-rays. The role of the Product Manager is the link between research and marketing. In addition to being responsible for product management, the role also involves responsibility for product development. We face new challenges in the expectation of rapid growth and need to strengthen our team with a senior individual who wants to take part in the journey.

THE POSITION

The Product Manager is responsible for products based on Luxbright's innovations and prototypes by:

- Identifying product requirements and potential new products
- Accountable for product life cycle
- Manage development and launch of products
- Responsible for product marketing strategies

YOUR PROFILE

We believe that you have at least a Bachelor of Science in Engineering, Industrial Economics or similar education (Master preferred) and about ten years of work experience as a Product Manager or Project Manager in Product Development of hardware technologies in business to business environments. Other preferred skills and experiences include:

- X-ray applications and/or technologies
- Business planning
- Project management
- Commercial experience
- You thrive working in an international environment with the world as your workplace

Travel in the job, mostly abroad where China is in focus, is about 30 days per year. As Product Manager, you report to the CEO and work closely together with the research manager and marketing manager. The position means that you have staff responsibility and are a member of the management team.

Since we are a relatively small organization, it is important to be flexible as tasks vary over time. We believe that you are an open and solution-oriented person who, together with your drive, get things done. Experience from building a company from idea to commercial success in an international market is advantageous. As a diverse organization, we communicate mostly in English. And because a lot of business takes place in China, proficiency in Mandarin is beneficial.

Take the opportunity to be part of building a company with growth as a focus on a broad international market.

Apply by sending your CV and personal letter to jobs@luxbright.com.

The last day of the application is *June 30, 2019*. We will conduct interviews and selection on an ongoing basis. For further information about the position, contact Mats Alm, CEO, at +46 31 796 06 97.

ABOUT LUXBRIGHT

Luxbright develops, manufactures, and sells X-ray tubes with improved performance based on nanomaterials and innovative design to a global clientele. Our patented technology offers micro-focus functionality for enhanced resolution, and field emissions bring benefits such as lower energy consumption and lower radiation doses. The products can be built into existing X-ray systems without the need for any re-engineering. Manufacturing of critical components takes place in Luxbright's laboratories in the Biotech Center in Gothenburg, and final production is in China.
